NOW**

## → INTRODUCTION

**Prof. Markus Hess**  
Deutsche Stimmklinik  
Hamburg, Germany

**Dr. Susanne Fleischer**  
Deutsche Stimmklinik  
Hamburg, Germany

Among phonosurgical procedures in patients with benign lesions of the larynx, office-based interventions, including laser surgery, has reached a level of high standard and is nowadays considered as first choice treatment for various diseases and disorders.

This hands-on training course will offer presentations of diagnostic and surgical techniques for various disorders of the larynx as well as video-presentations of typical cases. All participants will have the opportunity to learn many 'hands-on' intervention techniques with flexible channeled endoscopes as well as how to handle the instruments accordingly.

With over 20 years of experience performing office-based procedures by the faculties, this knowledge will be shared with the attendees during the practical course and show how one can perform these interventions. A special focus will be live case presentations. Explanation of tips and tricks as well as discussion of pitfalls and complications will complete the spectrum of topics

## → CONCEPT

Hands-on training course on office-based interventions for various benign mass lesions of the larynx with live operations, including laser surgery, and with hands-on training how to handle endoscopes for interventions.

## → FACULTY

Prof. Markus Hess

Dr. Susanne Fleischer
